SENTOSPHÈRE
SIRET 452 485 840 00022

At Sentosphère, “made in France” and industrial ‘relocalization’ are not just words but a conviction, demonstrated since 1988. The same applies to our approach to social and environmental responsibility, long before this requirement became a legal obligation or a normative “trickle-down” effect for all French companies.

Sustainable innovation founded our business model and, some 37 years later, continues to inspire it.

The employees of the “small group” of companies that I manage, the publisher Sentosphère and its two factories, Prosentos and Cartonage de Vaucanson, work hard every day to uphold our values. Because without committed employees, no manager can move forward with the projects that are important to him.

Manufacturing in France is not easy, sourcing supplies in France or even in Europe is not always feasible, but as far as possible, we try to manufacture “very French.” And while the norm is to say that if 50% of a product’s value is processed/manufactured in France, the product is considered “made in France”. We have chosen to go much further.

This year, for a matter of transparency, we are indicating the approximate percentage of our French sourcing on each product.

So, when you list a Sentosphère product, you’ll know exactly how much you’re contributing, based on our calculations, to the economic chain of French companies involved in manufacturing our products, whether they’re suppliers of aromatic raw materials or SMEs in the cardboard, printing, plastic injection, or thermoforming sectors.

We are firmly committed to supporting the economic fabric of SMEs and preserving expertise. **This year, we have therefore decided to invest in a machine for producing card games at the Cartonage de Vaucanson site, which is celebrating its 10th anniversary since we took it over.**

This allows us to return to our original business of **manufacturing innovative board games—the world’s first “olfactory” games**—but also to relaunch card games, some of which have received As d’Or awards in Cannes.

May 2026, which is beginning in a context that encourages us even more to “close ranks,” **be the year that strengthens our partnership around respect for consumers, so that we can continue to offer them high-quality,** affordable products that are manufactured close to them and provide unforgettable fun, scientific, and sensory experiences!

Le LOTO de la MUSIQUE

Author: Véronique Debroise

A game to bring children into the world of music at a time when their brains can more easily learn and understand its magic.

In the first game mode, there are 32 instrument tones to memorise, with each soundbite lasting approximately 20 seconds. In the second game mode, the instruments will be played in duets, covering well-known classical songs.

Using the game board as well as the electronic music box to help guide them, the children will be able learn and then recognise the instrumental duets, memorise the song names and composers and discover many different styles of music, from Renaissance to contemporary.

- Requires 2 batteries (not included): AAA (1,5 V-LR03)

Box contents and description

Le LOTO des SONS

Author: Véronique Debroise

After Sentosphere's amazing bingos around the senses of Smell and Taste, the range is now welcoming the Sound version.

120 sounds, with answers recorded in 8 languages, are presented in an interactive electronic box. Once a player presses on the button, a sound is released. Be the first one to recognise it and grab the chip that represents it! The player with the most chips at the end of the game wins. A fun educational game to discover city sounds, different music instruments or bird songs, all the while learning 120 words in 8 languages.

la légende du COLIBRI

Authors: Rémy Delivorias, Julien Prothière et Gricha German

Help the hummingbird save the rainforest from fire and flame! Carefully listening to the forest sounds on the mobile app, and using an animal's paw, players will have to pass on precious rain drops to help extinguish the fires, as well as seeds to help with the rejuvenation of the rainforest. However, putting out the fire won't be so easy! Between the raging thunderstorm, whose lightning frightens the animals, to the jaguar prowling through the trees, you'll need to be extra vigilant! This immersive cooperative game combines skill, reflexes and strong values, such as solidarity and mutual aid, that will delight all the family!

Bacchanales

HAVE FUN RECOGNIZING WINES

BACCHANALES is a tasting method that allows wine lovers to discover the grape variety or varieties they are tasting, guess a wine region or vintage, and even learn the wonderful vocabulary of oenology, just like a true professional.

Highly educational, clear, and precise, the method is simple. It is based primarily on our ability to analyze our olfactory perceptions. To do this, 40 aromas are presented in easy-to-handle capsules. Identifying these aromas in wines then allows us, using a table, to determine which grape variety or varieties they refer to, then in which region or regions, or even appellation or appellations, they are grown. Similarly, certain aromas reveal the type of vinification used on the wine or even its age.

So to impress all your friends, become a wine connoisseur with this Bacchanales version.

Box contents and description

Réf : 145

VOYAGE Olfactif

Authors: Véronique Debroise,
Arnaud Pincemaille and Philippe Attali

Adult version of Loto des Odeurs !

This game will make you travel without leaving your house! You will be able to go around the world in 31 smells from the Marrakech souks to the Polynesian beaches without forgetting to stop by the pyramids in Egypt!

During this collaborative game, each player will have to make the others guess their travel picture with the help of smells that can recall its geographic location, its colour or even what it basically represents.

This game presents 70 travel pictures taken across the world

along with 30 smells. Some associations are easy to make,

like the smell of lavender for a Provence landscape in France.

But other times, players will have to get

creative because the smells of leather, algae

or lemongrass are not always associated with

the same ideas depending on the players.

TOPSONG

Author: Véronique Debroise

Adult version of Loto de la Musique!

Do you think you can recognise, in just a couple of seconds, the most famous classical music pieces like Vivaldi's Four Seasons, Beethoven's Fifth Symphony or Tchaïkovski's Swan Lake? We have all heard these masterpieces in movies, at weddings or even in ballets as they are part of our culture, but we do not always know their name or their composer! This game is perfect to help you memorise these famous tunes and their composers.

This game also offers a sound quiz to recognise 46 music instruments!

A fun sensory and observation game to stimulate your reflexes and reveal one's musical calling.

500-PIECE PUZZLES POSTER STYLE

The 500 piece and 1,000-piece puzzle range, created in a retro poster style- for those who want to start making puzzles with a slightly higher degree of difficulty. Each jigsaw piece is the same size as the ones from our 1000 piece puzzles (but the format is exactly half the size). Once the puzzle is entirely assembled, you can frame it and hang it on the wall as a beautiful set piece.

PALETTE D'ARTISTE

With 29 references, all the designs are a true invitation to travel, escape or cocooning, appealing to all audiences who enjoy painting and relieving stress.

The quality of the paint, presented in **small bottles**, makes them easy to handle and helps reduce certain movements. Their **fluid formulas offer excellent coverage** to conceal the numbers, while making color mixing easier to create an infinite range of shades so that each painting becomes a unique creation.

The board is **rigid, thick and canvas-textured**, while the brushes have been extensively tested to offer the best possible experience and to follow the suggested outlines as accurately as possible.

For those who are sensitive to **Made in France** values and eco-design, this range offers paints made from a mix of acrylics and bio-sourced alkyds, providing 43% plant-based dry matter, in accordance with **standard 16640**.

Each kit contains between **13 and 16 colors** depending on the design, as well as a palette whose wells allow color mixing to obtain an infinite range of shades.

These paints are presented in leak-proof screw-cap bottles made from **50% recycled plastic**. They can also be recycled afterwards. The remaining paint can be used on pebbles, wood, plastic, ceramics or cardboard to have fun creating all kinds of objects to paint using a wide color range.

PEINTURE PAR NUMÉROS

Licornes

Réf: 4507

3 373910 045070

This range of painting by numbers has been developed with easy designs, perfectly adapted for young children.

Aspiring artists will be guided by outlines and numbers that will disappear completely under a layer of paint. With each colour added or layered, the painting comes to life.

The very stable paint pots, made of recycled materials, contain an acrylic paint of very high quality that will allow children to create their first masterpieces with opaque and vibrant colours. They can also be mixed together to create more shades.

This eco-designed range is made in France so that children can have fun all the while preserving the environment.

Aquarellum®

Aquarellum celebrates its 30th anniversary

For 30 years, Aquarellum has helped countless children discover color and the joy of painting, inspiring many creative vocations along the way.

For 30 years, more than 10 million kits have been sold worldwide and somewhere in the world, an Aquarellum painting is completed every 24 seconds.

Designed for both young children and older artists, I have never tired of painting the new designs each year in ten different ways.

The true strength of the Aquarellum concept lies in the freedom it offers, allowing complete expression through color harmony. What a pleasure it is to mix colors to create sumptuous gradients, to correct mistakes by layering inks and subtly adjusting shades.

The drawings themselves are carefully and intricately designed so that children are drawn to each theme, understand the image even when the outlines are only faintly tinted, and feel fully satisfied during and after the creative process.

Véronique Debroise, creator of Aquarellum

Aquarellum is a collection of paintings created by Véronique Debroise using an innovative and exclusive technique, that of masked vellum paper. This technique permits the creation of very subtle paintings: the brush does not run over the edges of the design, subjects magically appear with the vibrant coloured paints. Enjoy these large illustrations for even more magic!

Aquarellum

PHOSPHO

7 DÈS ANS

Thanks to its phosphorescent masked outline, children will be able to carry out with the same ease as with a classic white masked outline, the colouring of their painting. The palette of 7 basic colours, as intense as they are bright, will allow them to create wonderful shades that will highlight the drawing. After a few minutes under a halogen or in the sun, the contours of their painting will illuminate in the darkness or at night.

Ideal to fall asleep between mermaids, unicorns or in the universe of galaxies to make beautiful dreams.

Aquarellum MINI

The Mini Aquarellum range has been created to introduce the now famous masking technique. Using 3 mixable colours, one can create a pretty colour range to apply on 4 post-card size paintings.

Enjoy comparing the final results with Aquarellum Junior and its 5 colours, which make it possible to create all the shades of a rainbow, as explained by Véronique Debroise in her theory of colours.

WHEN PACKAGING BECOMES A FRAMEWORK

With more than 15 shades of sand, each SabLimage picture brings joy to children and builds their self-confidence, as the result is always successful.

For over 20 years, this technique has become a staple of artistic discovery suitable from age 4, it stimulates psychomotor development while allowing complete freedom in color interpretation, whatever the theme.

This year, the models have also been classified by age group, making it easier to recommend the right designs for each stage of development.

PATAREL

LA PÂTE À MODELER RÉVOLUTIONNAIRE

Patarev is the modelling clay that all parents have always dreamed of! It does not stain nor does it stick to fingers, clothes or tables. It also bounces, is scented, can be rehydrated, and the colours mix perfectly to make a wide range of bright colours. Its light and elastic texture is delightfully handled and encourages creativity at any age.

La Chimie des Cristaux

With two 120 g sachets of monoammonium phosphate, this kit allows you to grow crystals measuring approximately 5 cm, so beautiful that you will be happy to keep them as precious additions to your mineral collection. The crystals will be blue, yellow, green or transparent. Thanks to the two experiments included, children will understand that it takes very little to change the crystallisation process, as no two crystals are identical.

La Chimie de l'Effervescence

Off-gassing is a frequent chemical phenomenon found in nature, notably during photosynthesis. In this kit, several redox experiments are understood thanks to the solution that changes colour according to the pH it holds.

It will be possible to test the pH of a swimming pool, soil, washing powder or water using the same coloured reagents. Finally, this kit will enable you to reproduce a real volcanic eruption on a smaller scale.

Box contents and description

Le Système Solaire

This kit will help you discover our Solar System with 5 experiments. Thanks to Patarev pots, it will be possible to scale the planets while discovering their unique characteristics. You can also build a mini solar system and observe the principle of eclipses.

The instructions also show how to make a spinning top which, once launched, will help to understand and illustrate the movements of the Earth, which are responsible for the days and seasons. A compendium of discoveries that are as fun as they are educational, designed in collaboration with Jean-Loup Bertaux, astronomer at the CNRS and planetologist.

La Science des Parfums

An introductory kit to become a 'nez', discovering the principles of perfumery and the origins of natural products, such as the large molecules that transformed perfumery in the 20th century. A booklet also provides formulas to understand how a perfume is composed around top, middle and base notes, depending on the type of fragrance desired. Small spray bottles allow you to take your creations with you wherever you go! This kit also contains instructions explaining what an aromatic molecule is and the physiology of the sense of smell.

Box contents and description

Réf : 28320

8+

- 2 flasks of essential oils (lemon, lavender)
- 3 perfume bases (jasmin, rose, fruity)
- 4 aromatic molecules (musk, vanilla, violet, wood)
- 9 pipettes
- 4 empty flasks
- 3 sprays
- Paper strips to test your perfumes
- The history of perfume making and instructions to formulate perfumes

La Science du Cyanotype

A scientific kit for discovering one of the premiere methods of photography. It allows you to create beautiful designs using two reagents, a brush, the paper provided and stencils. These stencils preserve the reaction to light on certain areas. The stencils preserve the light during the reaction and reproduce the patterns in blue and white. In addition to the three stencil designs, it is possible to reproduce all kinds of grasses and leaves in blue and white. A frame is provided so that children can display their finest creations!

Box contents and description

Bougies Sables

These candles are very easy to make: the wax in the form of 'sand', colours very quickly in the beakers. The dye is absorbed within 24 hours, you can then have fun layering several colours of sand to create pretty effects in transparent containers. All you have to do then is stick 1 or more wicks in the sand. When you're ready to use the candle, simply add more wax on top of the melted wax to give it a new look.

Box contents and description

Réf : 2360

8 +

- 600 g of sand wax
- 5 dyes (blue, yellow, red, purple, green)
- 5 pipettes

- 10 candle wicks
- 3 beakers

Atelier Cyanotype Herbier

This photographic process is carried out with a paper that is coated in a mixture that reacts to the light and makes the exposed areas appear in Prussian blue.

You can create pretty arrangements of flowers and leaves on an adhesive that is then pasted onto the paper before exposing it to light. Stencils are also provided to make other types of cyanotypes, such as a picture of Paris or a bouquet. All fit into the 2 frames that comes with the kit.

Atelier Résine Bijoux

Design your own fabulous jewellery with this creative set! Simply mix resin with a catalyst, add colour to the preparation if you wish and then pour it into your choice of the moulds and pendants supplied.

You can make inlays to beautify your jewellery creations using the glitter and mini-fruits supplied. 20 hours later your creations can easily be removed from their moulds and turned into beautiful bracelets, rings, necklaces and key rings! A magical experience to take your first steps in creating 'designer' jewellery pieces!

Savons d'Artistes

Create beautiful handmade soaps for everyday use with a foaming base that respects the skin's natural pH, this is the promise of this creative kit. The soap base melts easily in the microwave or in a double boiler, then can be fragranced and colored before being poured into one of the 6 molds included.

The transparency of this glycerin soap highlights the colors of flower petals, snowflakes or oak leaves. The base can also be used to recycle old soap bars.
